NOTE FOR SUPPLEMENTARIES.

Under the Post War Plan, the scheme of opening primary Health centres was given effect to and 30 such centres were ordered to be opened in the year 1948. But subsequently the further opening of these centres was ordered to be deferred in view of financial stringency. At present there are only 23 primary centres working in Non-Firka areas and one in Firka area, namely Dendulur in West Godavari District.

2. During the Conference of the District Medical Officers held in August 1952, it was explained that many of the centres are not functioning properly and fulfilling the purpose for which they have been opened. They suggested that the primary centres as such should be abolished, and instead, mobile dispensaries based on Taluk Headquarters Hospitals should be started. This suggestion has been put to the Director of Medical Services for his remarks and his final reply is awaited.

3. Under the existing Rural Medical Relief Scheme rural dispensaries are opened and maintained by the District Boards concerned. The rural dispensaries are of two kinds: (1) Subsidised rural dispensaries and (2) Non-subsidised rural dispensaries. The initiative for providing medical relief facilities to rural population has to come from the District Boards concerned. Non-subsidised dispensaries are opened and maintained by District Boards entirely from their own funds. In case any District Board is unable to meet the entire expenditure on account of the rural dispensaries, the Government sanction the payment of subsidies to the Medical practitioner and Maternity Assistant employed therein. by Govt. by the P.D.B. No representation has been received by the Govt. or by the P.D.B. from the people of
